Ajay Yadav

Date of birth: 31/01/2000 | **Nationality:** Indian | **Address:** India (Home)

EDUCATION AND TRAINING

01/05/2018 – 10/12/2023 Hamirpur, India
BACHELOR OF ARCHITECTURE National Institute of Technology

01/04/2016 – 01/05/2017 Delhi, India
HIGHER SECONDRY EDUCATION D. A. V. Public School

01/04/2014 – 01/05/2015 Lucknow, India
SECONDRY EDUCATION A. S. Public School

WORK EXPERIENCE

COMPUTATIONAL DESIGNER – METAGUISE – 20/12/2025 – Current – GURUGRAM , INDIA

– Delivered ~50 facade projects across 5 months, averaging 10–12/month — typologies include diagrid, perforated skin, curved panel, flat cladding, and louvre systems in ACP, solid aluminium, and steel.
– Scripted each facade system from scratch in Grasshopper; reusable scripts handle recurring typologies end-to-end, with fresh parametric solutions developed for bespoke client briefs.
– GH scripts output fabrication-ready geometry and panel drawings for handoff to fabricators, coordinating geometry, tolerances, and fixing details across the production chain.
– Collaborating with technical and material teams on detailing, execution sequencing, and facade system documentation.

ARCHITECT – LOGIC DESIGN + BUILD – 01/06/2024 – 20/12/2025 – GURUGRAM, INDIA

– Led design and execution across 8+ projects spanning office, residential, and healthcare typologies — from concept through site delivery.
– Oversaw end-to-end execution of a 1,000–5,000 sqft commercial office fit-out — coordinating trades, timelines, quality control, and design intent across the full build.
– Designed and delivered ~15 custom furniture pieces alongside building projects, developing integrated spatial solutions from architecture to furnishings.
– Managed direct relationships with carpenters, metalworkers, and specialist craftsmen; oversaw material procurement and quality standards.

INTERNSHIP – LOGIC DESIGN + BUILD – 01/01/2023 – 15/07/2023 – GURUGRAM , INDIA

During my time at Logic Design+Build, I had the privilege of being part of a wonderful and cooperative team. As an integral member of the organization, my focus primarily revolved around Product Design developments, working drawings, and utilizing 5-axis CNC technology.

CO-FOUNDER – GRULL TECHNOLOGIES PVT. LTD. – 01/01/2023 – 30/06/2024 – NEW DELHI, INDIA

- Co-founded Grull.Work, a freelance marketplace disrupting traditional freelan cing with lower commissions, faster payments, and an equitable ecosystem for remote, decentralized teams.
- Built a two-sided platform where freelancers upskilled and found income opportunities while businesses discovered and vetted talent.
- Recognized and supported by institutions including IIT Madras and Deshpande Startups.
- Pivoted into Grull.Design, a CGI/VFX studio delivering 3D animation, architectural visualization, and motion content for agencies and brands — video deliverables generated millions of views across brand campaigns.
- Managed end-to-end project operations including client contracts, SOPs, talent acquisition, and proposal decks.

FREELANCE – 7DAY3IO – 01/03/2019 – 31/12/2022 – HIMACHAL PRADESH, INDIA

- Co-ran a 3D design studio over 3.5 years with two college batchmates, delivering 100+ projects for individual clients and small architecture firms
- Personal scope across the mix: computational design, parametric modelling, and fabrication-ready drawings architecture, product design, and visualization.

SKILLS

Parametric modelling (Grasshopper) | Building Information Modules (BIM) | Rhinoceros 3D + Grasshopper | Digital Fabrication Technologies (3d printers, CNC machines, Laser and Vinyl cutters etc.) | use CAD software | architectural design | manage manufacturing documentation | Adobe: Photoshop, Illustrator, InDesign | Design and Visualisation
